Profile

Software developer who builds with a product mindset — shipping full, working systems rather than isolated features. Across Android, full-stack web, and enterprise engineering, I've designed role-based platforms, integrated real-time cloud data, and automated business workflows end to end. I move quickly from requirement to working software, and I'm drawn to problems where good architecture, clean UX, and business impact intersect.

Technical Skills

Core Skills: Communication · Client Interaction · Presentation & Demos · Requirement Understanding · Team Collaboration · Problem Solving · Business Analysis · Relationship Building
Developer Tools: Git, GitHub, Docker, Ubuntu, Android Studio, Visual Studio, VS Code
AI-assisted development usage: Code exploration, debugging, documentation, research, development productivity and learning, with manual review and validation.
Languages: Python, HTML, CSS, Java, Kotlin, C#, JavaScript, SQL, node.js

Experience

Software Developer Intern — Prasanna Technologies Pvt. Ltd. **Jun 2026**

- Built dynamic, configuration-driven forms and UI components for enterprise software used across the internal platform.
- Debugged backend issues through log analysis, network tracing, and PostgreSQL validation, and took part in sprint planning using Git, Docker, and Ubuntu.

Freelance Software Developer — House of Anaika **May 2026**

- Partnered with the business owner to restructure Shopify storefront organization and product catalogue management.
- Built a Python tool extracting publicly available jewellery-retailer contacts from Google Maps, and centralized operations using Zoho CRM and Google Sheets.

Featured Projects

QuizApp — Full-Stack Online Examination Platform Code

- Developed a full-stack ASP.NET Core MVC platform enabling Admins to author quizzes and Students to attempt them with instant, auto-graded scoring.
- Implemented claims-based, role-restricted auth (Admin / Student) and modeled the domain with Entity Framework Core, plus an Admin analytics dashboard.

EventZee — Role-Based Android Event Management Platform Code

- Designed and built a two-role (Student / Organiser) Android app in Kotlin on the MVVM architecture, using ViewModel, LiveData, and Firebase Firestore for real-time data sync.
- Built an end-to-end registration flow — sign-up, UPI payment confirmation, and an auto-generated QR e-ticket via ZXing — replacing manual, spreadsheet-based registration.

Education

St Aloysius Deemed to be University *2025 – Present*
Master of Computer Applications (MCA) **Pursuing**

Government First Grade College *2022 – 2025*
B.Sc. (Computer Science & Mathematics) **CGPA: 7.7**

Certifications & Workshops

Introduction to Cybersecurity — NPTEL 2025

Introduction to Artificial Intelligence — IBM SkillsBuild 2025

Programming in Python — Infosys Springboard 2025

- C Programming (Spoken Tutorials) and Cybersecurity Workshop — IIT Bombay Tech Fest
- Python Masterclass — Hope Foundation; active participant in multiple collegiate hackathons

Leadership & Community

Co-Founder — DAT Community (Developer & Tester)

- Co-founded and help grow an open Discord community where developers, testers, AI/ML learners, creators, marketers, and builders collaborate to learn, experiment, build, test, and promote digital products.
- Contribute to community growth, content creation, publishing, collaboration, and product-focused initiatives.

Head of IT Team — Gfgc Malur

- Led the college IT team, coordinating technical activities and supporting digital initiatives and events.

Host & Coordinator — Eleven Bytes

- Hosted and coordinated a coding event with participants from 25+ colleges across Mangalore and surrounding regions.
- Managed event communication, coordination, and participant engagement.

Additional

Soft Skills: Presentations & Demos · Hackathon Pitching · Client Communication · Team Coordination · Content Creation · Creativity · Experimentation

Interests: Open Source · Chess · Psychology · Startups · Reading · Fitness
